

Nicolas Zilli

Lead Mobile Engineer · React Native / TypeScript · 10+ yrs

Lyon, France (Remote-ready) · m.nicolas.zilli@gmail.com · linkedin.com/in/nicolaszilli · Open to: Staff & Founding Engineer roles

SUMMARY

Staff-level mobile engineer with 10+ years owning products end-to-end — greenfield to production, sole IC to team lead. Deep expertise in React Native / TypeScript across the full stack. Track record of driving system-level decisions (architecture, auth migrations, monorepo strategy, CI/CD) and scaling mobile products from 0 to paying customers.

EXPERIENCE

Tennaxia

Lead Mobile Engineer

Dec 2024 – Present

Lyon, France

- Owned the mobile platform from day 0: React Native + Expo app integrating Trackdéchets (French gov waste-tracing, beta.gouv.fr), shipped from zero to paid beta in under a year
- Designed offline-first data layer, custom design system, and Turborepo monorepo shared across mobile + web — team scaled from 1 to 3.5 engineers without regressions
- Co-led a company-wide Auth0 migration affecting all products; drove OpenAPI spec adoption on a backend with no prior contract

C+NET · wedoproduct studio

Lead Mobile Engineer

May 2022 – Apr 2024

France, Remote

- Sole engineer for 4 years on an Android field app (waste management agents, low-connectivity) — built offline-first sync, QR code data exchange, and MDM/EMM fleet management from scratch
- Delivered continuous feature development over 4 years while maintaining zero critical production incidents

CVDesignR · wedoproduct studio

Mobile Engineer

Jan 2024 – May 2024

France, Remote

- Built TalentPicker (recruiter mobile app) from scratch in 5 months: auth, webview navigation, push notifications & deep links via Brevo
- Set up EAS-based CI/CD pipeline with OTA updates and automated App Store / Google Play submissions

Hivebrite · wedoproduct studio

Senior Mobile Engineer

Jun 2020 – Jul 2023

France, Remote

- Designed an App Factory — tooling that automated generation, white-labeling, and store submission of RN apps for 50+ clients (alumni networks, nonprofits)
- Developed a real-time chat module in React Native (mobile + web) with Sendbird; built a Go push-notification service deployed on Kubernetes
- Negotiated and structured the commercial engagement: fixed-price phase 1 → time-and-materials for scale

WELO · wedoproduct studio

Mobile Engineer

Oct 2021 – Jun 2023

France, Remote

- Shipped a cross-platform (iOS / Android / Web) property management app; mentored a junior developer

Mobi2Go

Senior Frontend Engineer

Jun 2019 – Mar 2020

Wellington, NZ

- Led migration from legacy frontend to React Hooks, React Router, and Next.js; rebuilt marketing site and established frontend test coverage

EARLIER EXPERIENCE

Full Stack Engineer, beta.gouv.fr (Avril / France VAE) — Built MVP from scratch in Elixir/Phoenix; iterated with data-driven product management. (2018–2019)

Full Stack Engineer, Figaro Classifieds — Built recruitment tooling (questionnaires, applicant tracking) from scratch; DevOps role during major infra migration. React, AngularJS. (2016–2018)

Software Engineer, Alteca — Client projects in the JVM ecosystem with JavaScript frontends. (2014–2015)

SKILLS

Mobile: React Native, Expo, TypeScript, TanStack Query, GraphQL, REST, offline-first architecture

Frontend: React.js, Next.js, Tailwind CSS

Backend & Infra: Node.js, Elixir/Phoenix, Go, Docker, Kubernetes, PostgreSQL, Redis

Auth & Services: Auth0, Sendbird, Algolia, Brevo

Tooling & CI/CD: GitHub Actions, GitLab CI, EAS, Turborepo, App Store & Play Store deployment

EDUCATION · LANGUAGES

M.Eng. Computer Science, Polytech Lyon · 2014 **French:** native **English:** full professional (10 months in New Zealand, daily use in international projects)
